61. Website SEO guide - Whether you have a website explaining the idea or a domain that redirects to your referral links you need to promote and

draw visitors to your site. Search engines are one of the most used websites in the World and can draw massive traffic to your website. But you have to

be high up in the rankings and be one of the first websites that catch the user's eye. To do this you need to Search engine optimise. Now I can't go into

detail about SEO but I can supply a link to help you. This ebook is sold on eBay and fetches a few Bucks/Pounds/Bills every time. But here's a link

where it's yours free.

(Download the SEO made easy ebook)

This ebook will guide you through the easy steps to success. You will boost you search engine traffic and drive people to your referral links.

62. Business cards - Another day, another method. This is been described as the best and most successful referral technique ever. Business cards are

way to promote your referral site offline. Add your referral link to your business cards and distribute them in crowded spots, people say outside game

shops gets the referrals flowing. Also you can leave them in visible places that people may pick them up.

Luckily Vista Print gives away 250 colour customised business cards totally free. But

you do have to pay for the postage.

63. website address guide - With all referral sites we are given a link to refer others. For example

www.example.com/r=1234567890. It's boring and people will not remember the whole address. Maybe just the www.example.com but not the important

part, your the referral link.

Okay these are the methods I use.

people actually sign up with these sites just to see the other freebie websites out there!

millions of viewers viewing the website, as simple as that. Then you should start raking in the referrals like crazy!

66. Forums, use forums for tons of stuff, use the banners for everything, anywhere you go that you can have a signature when you type, use that

website then post a lot.

67. Tell all of your friends about the website.

68. Send letters to everone in your neighborhood. They will sign up, I promise you this, I did this and got about 40 referals fast.

69. Do you use ebay? If you do then on every auction listing you do, include a the description about the website and give them your referral link, this is

a big one, you will get TONS of referrals, especaly if you are a powerseller or something like that.
